

NESVS Webinar for Medical Students & General Surgery Residents

Wednesday, September 2nd @ 6:00pm EST – Zoom

What is Vascular Surgery?

Moderators: **Edward Gifford, MD & Jesse Columbo, MD**

"What is Vascular Surgery"

Katie Shean, MD

St. Elizabeth's Medical Center, Boston, MA

"A Day in the Life of a Vascular Trainee"

Gregory Mouradian, MD

University of Vermont Medical Center, Burlington, VT

"Pathway to Vascular Surgery"

Paarth Jain, MD

Dartmouth Hitchcock, Lebanon, NH

The New England Society for Vascular Surgery invites interested medical students and surgery residents to come and learn about the exciting and innovative field of vascular surgery. Learn about the types of patients we see, and procedures we perform, from open abdominal aortic aneurysm repair to minimally invasive lower extremity arterial revascularization.

Hear about the different pathways to a career in vascular surgery including integrated vascular residency and vascular surgery fellowship. Listen to a day in the life as a vascular surgery trainee - from emergency room consults, to in-office procedures.

Take advantage of the opportunity to meet with (virtually) and ask questions of current trainees and faculty from around New England. Hope to see you there!
